

Products Offered

24/7 AI receptionist

Function Specific Virtual Assistant

Your Personal Executive Assistant

 THE PROBLEM

Loss to business due to an unanswered call

**Product is not the MOAT, fastest fingers' first is.
You spend so much on marketing, attend to enquiries first hand.**

62%

of calls to small & mid-size
businesses go unanswered
during busy hours

80 hrs

teams spend on
busywork than on real,
revenue-driving tasks

3x

missed revenue due to
your unavailability when
customer reached out

Every delayed reply gives someone else a chance to win the customer.

HOW SRIAI SOLVES IT ?

A role for **every part** of the business

Every SriAI helper is built for one job, ready in minutes, and always on shift.

AI Receptionist

Answers every call, greets, and routes never puts a customer on hold.

Task-Specific Assistant

A dedicated helper trained on one workflow, built around your process.

Personal Executive Assistant

Manages your calendar, inbox, and priorities like a chief-of-staff on call.

Sales Assistant

Qualifies leads, nudges follow-ups, and keeps every deal moving.

Customer Support Assistant

Resolves common issues instantly, and escalates the rest with full context.

HR Assistant

Handles onboarding questions, leave requests, and policy queries instantly.

Operations Assistant

Keeps the back-office running tracking tasks, updating records, and flagging what needs attention.

✓ Active 24×7

PRICING TRANSPARENCY

Cost Estimation

We have our personalized cost estimation system - built inhouse. Check it to understand how much cost.

Choose what you need, skip what you don't, and see the estimated cost instantly. No hidden pricing.

MEGHALI - VOICE AGENT CONFIGURATOR

Assemble the stack. See cost, latency, quality & build time live.

Every piece is a real vendor with real numbers. Mix and match across the layers — the scoreboard, cost model and English warnings update as you go. Start from a preset, then make it yours.

Start from a preset

- Budget Reach**
Lowest TTSes, all-Indian stock. Maximize calls.
- Recommended Balance**
Our default — Sarvam English + a premium voice, event end-to-end.
- Lightning**
Fastest possible. Open weights on Groq, no GPUs — but US-based.
- Premium Human**
S2S realism. Sounds human, costs more, looks you in.
- Sovereign / On-prem**
Data stays in India. Self-host everything, compliance first.

Build the stack
The live signal path — switch any node in place. Hover a node's icon for its details & warnings. Pick an S2S engine to fuse the cascade.

Orchestrate by **Repeat** **Turn detection** (on your sound, +10)

PERCEPTION None-canned **VAD** Turn detection (on your sound, +10)

None

- Sarvam Saanika STT ~+0.50/min
- Deepgram Flux STT ~+0.62/min
- ElevenLabs Scribe v2 ~+0.62/min
- Whisper large-v3 (self-host) ~+0.30/min
- Groq Whisper large-v3 ~+0.38/min

Call volume
Realistic call duration
Call attempts / month: 10,000
Pickup rate: 30%
Avg call length: 2 min

None

- Gemini 5.5 Flash ~+0.20/min
- GPT-5.4-nano ~+0.02/min
- Sarvam-308 ~+0.00/min
- Sarvam-305B ~+0.00/min
- GPT-5.5 ~+0.60/min
- Gemini 3.1 Pro ~+0.28/min
- Llama / Qwen (self-host) ~+0.00/min
- Llama 3.1 8B (Groq) ~+0.03/min
- Llama 3.3 70B (Groq) ~+0.03/min
- Llama 3.3 70B (Cerebras) ~+0.25/min
- DeepSeek V4 Flash ~+0.03/min

None

- Sarvam Bulb v3 TTS ~+1.36/min
- Sarvam Bulb v2 TTS ~+0.63/min
- ElevenLabs Flash v2.5 TTS ~+0.15/min
- Cerebras Sonix TTS ~+1.80/min
- Deepgram Aeneas 2 TTS ~+1.80/min
- Resemble AI (on-prem + cloning) ~+1.51/min

Compatibility
Strong third-party support. Color = soft English warning.

ElevenLabs Flash v2.5 TTS is slow, not native, on Hindi
Resemble AI Flash v2.5 TTS handles Hindi but isn't India-focused. Fine for a demo. Sarvam is stronger on real code-mixed speech.

Cost
\$3.35 variable, per connected minute

Latency
938ms response round-trip

Generation quality
Voice: medium

As you change models, modules, or features like RAG and Recorded Opener, the estimated cost updates instantly, giving you complete pricing transparency before deployment.
